COVID-19 Antigen Rapid Test

Our COVID-19 Antigen rapid test detects nucleocapsid (N) protein and Spike (S) protein fragment of SARS-CoV-2, which makes the test highly specific and for detecting the presence of the virus.

Direct Antigen detection from the site of the infection helps in the early diagnosis of COVID-19 as it plays an important role for virus detection in the early stages of the disease. SARS-CoV-2 antigens are generally detectable in upper respiratory specimens during the acute phase of infection.

Product Features :

- **High accuracy : 97.5% (Results compared with RT-PCR).**
- **Fast results- i.e. 15 minutes.**
- **Easy visual interpretation.**
- **Simple operation. No equipment required.**

RADCOV4 - 2019-nCoV Antigen Rapid Test with Sample Swab and Specimen Container - 20x Test Kit.
